

Do You Hear the Giant Sucking Sound?

*...the Sound of
Manufacturing
being Brought
Back to our
Shores!*

With all the negative news, the good news for our country and our industry is the return of manufacturing to the USA. With the technology Eurotech delivers, coupled with good old Yankee Know-How, labor costs become insignificant. And the USA can dominate the manufacturing industry. The key to this is technology.

For example the NEW TROFEO RB2 (robot), the fastest bar machine in its class, is now equipped with a built in robot for loading and unloading larger diameter or odd shaped parts. Thus you have three machines in one without interference, i.e., an operator can have full access to hand load prototype, run bar work unmanned, or run a robot loaded work unattended. AND ALL THREE without interference and wasted changeover time.

“Eurotech’s Technology works! Our machine truly *run faster, sleep less* than the competition. You can buy a 20 year old Eurotech and it’s faster than the newest competitors' machines; plus Eurotech delivers life-time free training and online phone support which is essential to utilizing the technology.”

- Ron Gronback, Owner of PDQ

“With our investment in the Eurotech, we saw a 38% increase in throughput! The technology is just easier to successfully run than the competition!”

- Charlie King, Owner of IDM

"With the Eurotech technology and a commitment to lights-out, we grew fast. We have more machines per operator. We are winning the business we want to AND spending more time with family."

- Mike Dowell, Owner of Axem
