

**Press Release:
July 2011**

*Technology that
Runs Faster,
Sleeps Less!*

Multi-Task Technology *of* MCM Clock-Tank *for* USA

Jeff Walz, Ferruccio Rossi,
Joe Selway, Giuseppe
Bolledi at the amazing
MCM factory in Northern
Italy.

NEW AGREEMENT FORGED FOR THE CLOCK-TANK HMC IN USA:

The demand of Eurotech's valued customers and a lot of research, have led us to this exciting announcement! On our trip to Italy last month, we committed to a plan with our partner MCM to educate the US market on the benefit of the #1 selling multi-task horizontal in the European aerospace industry. The MCM Clock-Tank is the "Star" of the line-up, a heavy duty series of hand scraped machines delivering up to 1000 Newton meters of torque and increased productivity by 40% for heavy duty turning, milling and grinding on larger components.

The MCM (Machining Centers Manufacturing) Clock-Tank machines have been widely sold throughout Europe and has the undeniable reputation as **THE "#1 HMC IN AEROSPACE IN THE WORLD"**. To date the Clock-Tank has not been promoted to the same degree here in the states but as the demand for multi-task machines has been increasing, we needed this solution for our customers and the Clock-Tank is hands down, undeniably the "Best Solution!" In anticipation of the US demand, MCM has expanded their factory and has already increased their production of this series.

Two reasons for focusing on this model over the vast series of machines produced in our factory is 1) its high reputation in Europe's aerospace industry and the famous Technic Valley and 2) how well it answers the advanced technology our customers are already asking for. Customers in the aerospace, energy and automotive industries will find the Clock-Tank HMC will meet their demands and offer solutions better than any other.

MCM Clock Tank meets and exceeds the demands of aerospace, energy, automotive and general purpose components of production equipment requiring extremely high tolerances. The Users' List reads like a Who's Who of Manufacturing with companies like: **Ferrari, Airbus, Beretta, John Deere, Benelli, Ruag Aerospace Defense, Siemens, Fiat, Dassault Aviation, General Motors, Lamborghini, Gima, Liebherr Group, Citroën Automotive, Schwing, Sidel, and many more!**
