## A BIG, POWERFUL TURN/MILL CENTER THAT IS FAST, ACCURATE AND REAL SMART

Most machines that boast of 40 hp, double wound motor, 48" centers, over 4" bar and over 15" turning are slower and less accurate than smaller machines...**NOT THIS ONE!**

This turn/mill center delivers Eurotech's legendary speed and accuracy with glass scales in X, Y, and C axis as well as air-conditioned electronics and tool probe system.

With features like up to 96 cutting tools or 24 live tools, you can machine either extremely complex parts in one operation or make hundreds of different parts with one set-up; and most importantly do it simply with Eurotech advanced technical features such as damage protection software, tool load monitoring, tool life management, rigid tapping and polygonal turning.

Eurotech, 1150 Ponce de Leon, Brooksville, FL 34601
