

ANNOUNCING EUROTECH'S TROFEO SERIES OF 2010

Eurotech's new Trofeo series offers a superior design that delivers extremely efficient and fast production of complex components, using live tools, C-axis and Y-axis. This high precision turn/mill center has up to 11-axes with dual turret and dual spindle. The Trofeo series is a cut above its competition with advanced technology: 192 cutting tools for machining complex, precise parts and up to 48 live tools for milling operations.

gap elimination, Eurotech's tooling system (EGS[®]), indexing on the fly, elimination of dwell times, incredible pick-off speeds, zero wait for C-axis engagement on live tool machines, ClearShift 2-axis programmable sub-spindle to eliminate interference and decrease cycle times, programmable 2-axis servo driven parts gantry and conveyor system, built-in/ no add-on automation.

Over \$60,000 in options plus many productive machine features are included, such as 2-axis Programmable Automatic parts-catcher for main and sub-spindles (no change-over), and Fanuc 31i-T Series three channel control.

See Eurotech's demo video library on their website at www.eurotechelite.com (click Video Demo tab). For more information contact Jeff Walz at jeffw@eurotechelite.com or call 352-799-5223.

Unmanned machining...the leader in Lights Out Manufacturing! The ultimate in bar machining and auto loaded components. Complete parts in one operation. Eliminate handling, fixturing and inspections.

A redesigned layout eliminating "chip shelves" found on most dual turret machines. ***Designed from the ground up for speed*** with

"We did not believe Eurotech would achieve the cycle time they quoted us, and we thought if they came anywhere close we would be happy. We are making our part even faster than they quoted! We are so pleased with the machine. I'd love to buy three more right now." -Troy Jones, Accratorics
